
Future Events

We have some events planned for the next year to come. Next year we will be attending the 34th annual Northeastern Storm Conference. The details aren't out, but come to our meetings to find out more about it. Another big trip we are planning to attend is the 89th annual AMS Meeting that will be in Phoenix Arizona. We hopefully will get to go to this conference. More information about this trip will be known in the fall of 2008. Some other things we have planned are having some more guest speakers as well as taking more trips to various places. One place we will make a trip to next fall is the National Weather Service. We will be able to take a tour and get to watch the release of a weather balloon. We can't stress this enough to attend our meetings regularly. There are always new ideas for trips and other things that are small, but are never planned. Also, it's a place to come talk about the constantly changing weather.

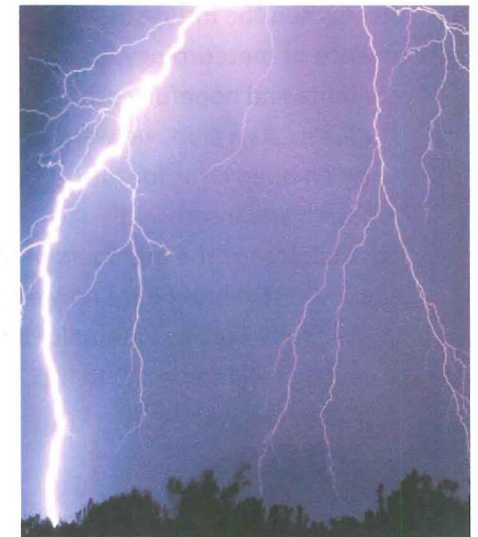

Stony Brook Meteorology Club

President – Alexander Titus
Vice President – Ashley Haelen
Secretary- Alex Kahn
Treasurer- Karen Bubelnik

About the Club

The purpose of this club is to get students with Atmospheric Science as their major as well as others interested in weather to come together as a community. We feel building this community will strengthen the interest of the science of meteorology to the students and hopefully prospective students. As a club, we want this to be an open door for future research and internship possibilities for the members of the club. We also bring our knowledge to the Stony Brook community by providing local forecasts to the public on our webpage.

Club Meetings

Club meetings are held every Thursday at 5:10pm in Endeavour Hall Room 120 which is in South Campus. Everyone is welcome.

**Times are subject to change on a semester basis.*

Club Activities

As a club we have done several things over the past year. Since we are a relatively new club, we are still trying to make our own traditions. One of them that we have been doing for the past couple of years is making a boat for the Roth pond Regatta which happens every spring. Another tradition we are trying to make is attending the Northeastern Storm Conference. This year was the first time ever that the Meteorology Club has gone. This storm conference exposes both students and professionals alike to the most recent research in various meteorological fields. We will attend next year and hopefully many years to come. We have various speakers to come to talk to us. They vary from employees of the National Weather Service to on camera meteorologist from News 12.

Upcoming Events

There are still some upcoming events for the Meteorology Club for this year.

1. The Skywarn Training class. This is a class that trains you to become a storm spotter to help the National Weather Service identify certain storm criteria. The class is offered on April 30th right here on Stony Brook's campus in Endeavour Hall Room 120 from 7pm to 10pm. The class is completely free. You can register for this class by going to: <http://www.erh.noaa.gov/okx/Skywarn/spottertraining-08.htm>
2. The Roth Pond Regatta is May 2nd. We need anyone that is willing to come help us duck tape that boat together as well as cheering us on as we sail our ship down the Roth Pond.
